Subject: Confidential - Sewer Gas Sampling Update
Attachments: View Looking S on Forsythe_Near Ross Court.JPG; Closeup Sewer Gas Sampling_Forsythe St.JPG; Sewer Manhole_250054_Looking E_SE.JPG; Sewer Manhole_250054_Looking south.JPG

Hi Carolyn. Attached please find 4 photographs. Two of them relate to the existing sampling activities along Forsythe Street and the 2 other ones are pictures of the western most sanitary sewer manhole (Manhole ID #250054) along Hamilton Avenue. As you can see from the pictures, there is only one pipe entering/exiting the manhole and it is located on the east side of the manhole. It is also dry. This confirms that the sanitary sewer is not connected to any sewer lines further west of this location.

Also, as we discussed, we are not entering any sewer manholes and when we purge the ambient air from the lines prior to sampling, we are using a 4 gas meter. No issues with methane.

Please contact me with questions or if you need anything else.

Sincerely,

Bradley E. Gentry, LPG
